

THE CROWN  
FOR YOUR  
KITCHEN

# PANAMA

**REGINOX**

# A SMART **SYPHON SOLUTION**

## Space saving syphon

The Panama is a complete waste system which saves a lot of space in every cabinet. With an integrated rubber valve that replaces the trap. The water pushes the flexible rubber valve to one side to then be discharged into the drain. Afterwards, the rubber closes the trap again, so that water or smell can't return through the waste outlet. The installation is very simple. The space-saving syphon is connected directly to the outlet. The Panama is suitable for both new and already installed sinks.
